DESCRIPTION AND PURPOSE OF ITEM

This item identifies the Marked Route carried by a highway.

This information is used for map preparation and for reference point generation on intersecting highways.

This item can be verified on a County General Highway Map or by contacting the district Bureau of Operations. If in question, contact the Central Bureau of Urban Program Planning.

Note: This item is recorded on IRIS and transferred, by computer, to ISIS Inventory Route (Item 5) and IRRIS Marked Route Number (Item MRIT39A).

CODE AND SCREEN ENTRY INSTRUCTIONS

A 6-digit alphanumeric code, left justified.

1st position - type of Marked Route

Code	Type
I	Interstate
U	U.S.
S	Illinois

2nd - 4th positions - Marked Route Number
Record right justified, filling unused positions with zeros

5th position - Marked Route Suffix

Code	Suffix
A	Alternate
B	Business Loop
P	Bypass
T	Truck Route
Blank	Not Applicable

6th position - Marked Route Couplet identifier

CODE AND SCREEN ENTRY INSTRUCTIONS

Example	Description
I064	I-64
U066P	US 66 Bypass
S001 B	2nd couplet along IL 1

Revisions to Marked Route alignments are entered by the Central Bureau of Urban Program Planning. Use the following procedures to make changes:

- To close a Marked Route in its entirety:
    Using the Link/Node Interface Inquiry screen:
    - Select the desired Marked Route
    - Select the active alignment (To Date: 99/99/9999)
    - Change the To Date to "12/31/YYYY", where "YYYY" is the previous calendar year
    - Change Route Status to "C"
    - Press PF6 twice (Do not use PF10 "Delete" as this removes the selected alignment without keeping a historical copy.)

- To alter a Marked Route alignment:
    - Submit RIS-S560 – Marked Route to Key Route Table Creation – for an overnight run
    - The next day, using TSOA ISPF, edit 'HIGHWAYS.RISD0QA'
    - Delete all Marked Route alignments EXCEPT the route(s) to be revised
    - Make the desired revisions
    - Save 'HIGHWAYS.RISD0QA'
    - Submit RIS-S561 – Marked Route Interface Load – for an overnight run

- To add a new Marked Route alignment:
    - Using TSOA ISPF, edit 'HIGHWAYS.RISD0QA'
    - Delete all Marked Route alignments
    - Enter the alignment for the new Marked Route
    - Save 'HIGHWAYS.RISD0QA'
    - Submit RIS-S561 – Marked Route Interface Load – for an overnight run

Note: Any number and combination of altered and new marked routes can be included in 'HIGHWAYS.RISD0QA' for the same RIS-S561 submittal.
